Jira Ticket Report Template

I. Bug

1. General

a. Please provide the short description of this issue. The **title** must match what do you want to describe inside this ticket.

b. **Reproduced step, software version**, **map version, occurrence rate** are mandatory.

c. Clear **screenshot, video and coordinate** will be helpful to understand this issue.

d. **Android logcat** message is mandatory. DLT logs filters out the debug level log. Our product team can't analyze those issues.

e. ANR log is required if this is an ANR issue.

f. In case the logs are not enough, TomTom will provide additional guidance to collect more details logs. This log will also output into the logcat message.

2. Client SDK issue

Please provide the description of

a. api called and parameter passed in

b. response received

d. expected response

e. **version** of the client sdk and Automotive UI

Note: In case you see an unexpected result or system crash when you call API of Client SDK, it is a Client SDK issue.

3. TomTom Issue report template

Below is the reference Jira issue template used by TomTom internally

```
h3. Test Environment
_<Description of the testing environment, network status, software version
and map version>_

h3. Problem description / Observation
_<Description of the observed problem/behavior>_ Occurrence rate

h3. Reproduction steps
_<Instructions how to reproduce the issue, preferably step-by-step>_

h3. Actual outcome
_<Actual behavior>_

h3. Expected outcome.
_<Expected behavior>_

h3. Exit conditions/workaround.
_<If possible, ways to either prevent the problem from occurring or restore
the behavior>_

h3. Additional info:
_<More information, e.g. links to additional logging>_
```

II.Improvement/Requirement

To let the product team understand precisely what is the request.

Please provide the following information

1. Detailed description about this ticket.

2. Video and screenshot will be helpful to easier to understand your requirement.

3. What is the expectation from your side

4. Why this feature is important? Background information. Do you receive any complain from the driver?

5. Where do you plan to use this feature (only mandatory for client sdk, shortcut……)? Visual design will be helpful to understand your concept.
